# Paper leather products

We develop practical and differentiated designs using eco-friendly paper leather. Experience Studio Floue's sustainable products.

Paper leather Laptop pouch

Paper leather Passport case

Paper leather Book cover

Paper leather Calendar

*It is a sustainable product that can be used continuously by changing the inner surface.*

## Eco-friendly certification

Studio Floue uses materials that are certified as eco-friendly.

### FSC Eco-friendly production certification

*Legal afforestation and logging production for sustainable forests*

### OEKO-TEX Eco-friendly product certification

*Tested for harmful substances that cause diseases or allergies with over 100 strict criteria*

# Features of eco-friendly paper leather

Introducing paper leather, an eco-friendly material that is tear-resistant, water-resistant, and stronger than leather, used by Studio Floue.

## No tearing!

*It doesn't tear easily unless you cut it on purpose.*

## It's water resistant!

*Easy to manage by lightly shaking to remove moisture.*

## It's light!

*It weighs less than 100g for a 13-inch laptop pouch.*

## It's very durable!

*I actually used this pouch for 4 years and it worked well without any tears.*

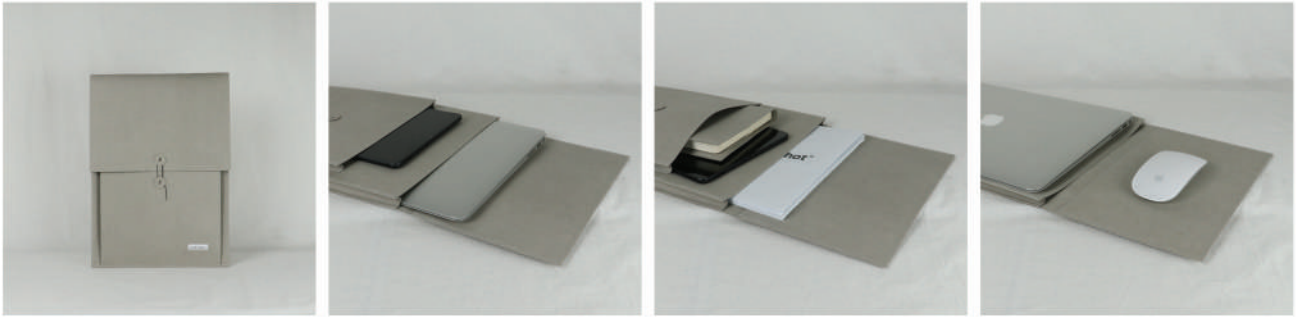

# Eco-friendly paper packaging

Studio Floue pursues a minimal packaging method using paper delivery boxes, paper tape, and paper cushioning materials.

*Studio Floue, an eco-friendly paper and leather workshop that uses only paper from products to packaging*

## Paper leather Laptop pouch

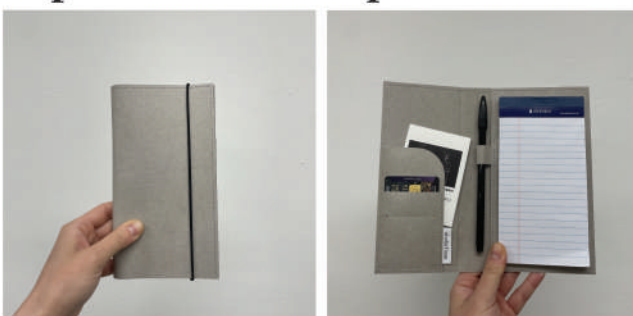

- It is very light to use because it weighs about **100g** based on a 13-inch laptop pouch.
- You can choose from a **variety of sizes**, from tablets to 17-inch ones.
- You can store not only laptops but also documents,  
You can store **tablets, diaries, mice, chargers, etc.** in the auxiliary pocket.
- The cover part is an integrated design that **can be used as a mouse pad**,  
and the inside of the cover part can store memos, etc.
- **Unlike leather**, it is **water-resistant**, so you can use it conveniently and practically.

## Paper leather Book Cover

- It is a sustainable design that **can be used continuously** by replacing notes or books.
- The internal pockets are **composed of various sizes** and have a pen holder,  
making it practical.
- It is **compatible with various sizes** from the new national size to A5 and B6.
- It can be **easily opened and closed** with a rubber band, and a rubber band  
that replaces a bookmark is attached inside.
- It has the advantage of being **lightweight** at around 70g and being **water-resistant**.

## Paper leather Notepad Cover

- It is a sustainable design that can be used continuously by **refilling the notepad**.
- It is practical because **the internal pockets are composed of various sizes** and **there is a pen holder**.
- It is composed of various sizes such as **mini, B5, A5, A4, etc.**
- It is convenient because **it can be easily opened and closed** with a rubber band.
- It is **lightweight** at about 50g and is **water-resistant**.

## Paper leather Passport Case

- **RFID blocking** function protects information such as electronic passports and credit cards.
- It is highly useful because **it can store passports, boarding passes, credit cards, cash, tickets, receipts, etc. all at once.**
- It supplements the existing frequently used open passport case, and is very practical with a card wallet design that **can be easily and quickly removed and inserted.**
- It is **lightweight at about 30g** and is **water-resistant.**

## Paper leather Tissue Case

- This product can complement the existing plastic or leather cases that are widely used.
- **It does not break even if dropped, and is resistant to stains and discoloration, so it can be used practically.**
- It is a sustainable design that **can be used continuously by refilling each tissue.**
- It is composed of small and large sizes, and is **compatible with most tissue sizes sold on the market.**
- It is **lightweight at about 50g** and is **water-resistant.**
